

DEMAND TREATMENT

YouTH SUBSTANCE ABUSE Treatment COLLABORATIVE

A Directory of Regional Adolescent Substance Abuse
Prevention and Treatment Services,
Support Groups
And
Community Groups

Includes information on what to do if a child is using
substances, plus questions to ask treatment providers
when seeking treatment for a child.

Present members of YSAT include: Bellevue Independent Schools, Boone County Human Services, Campbell County Schools, Cambell Lodge Boys' Home, Carroll County Schools, Catholic Social Services, Covington Independent Schools, Children's Home of N. KY., Department of Community Based Services, Department of Juvenile Justice, Family Service, Gallatin County Schools, Grant County Fiscal Court, Grant County Schools, Kenton County Schools, Kenton County Alliance to Prevent Substance Abuse, Mental Health America of NKY, NKY Board-Agency for Substance Abuse Policy, NorthKey Community Care, NorthKey Regional Prevention Center, Owen County Schools, Pendleton County Schools, St. Luke Hospital West, Transitions, Inc., and youth advocates.

We continue to recruit members. Call 859-283-9222 and ask for Mary Pat Behler if you are interested in participating.

**This is not a comprehensive directory of local resources.
For more adolescent services and for adult services, check your local yellow pages.**

As of Fall 2008 the information listed is correct.

This directory was compiled by the Northern Kentucky Youth Substance Abuse Treatment Collaborative (YSAT). We are a collaborative comprised of community leaders including individuals from the Department of Juvenile Justice, Department of Community Based Services, school officials, police, clergy, substance abuse prevention and treatment providers, and youth advocates. The mission of YSAT is to build a regional partnership and care system unified by the common goal of effectively addressing and reducing teen substance abuse in the eight-county region of Northern Kentucky (Boone, Campbell, Carroll, Gallatin, Grant, Kenton, Owen, and Pendleton). Services we provide to the community include:

- Teacher In-services and Community presentations on:
 - Signs and Symptoms of Alcohol/Drug Abuse
 - Dangers of Underage Drinking and Marijuana
 - Teen Substance Abuse in N. KY. – It's More than Heroin
 - How to Get an Uncooperative Child in Treatment
 - Addiction – It's a Disease, Not a Moral Weakness
 - Prevention and Treatment Resources in N. KY.
 - How to Advocate Your State Legislators on Teen Substance Abuse Issues
 - Other issues regarding teen substance abuse
- Advocacy on N. KY. teen substance abuse issues
- Trainings for substance abuse treatment providers and other youth service workers on teen substance abuse issues
- Referral source for prevention and treatment resources, locally and throughout the state

We have listed youth substance abuse prevention and treatment services, as well as support services, available in the Northern Kentucky/Greater Cincinnati Area. Because Northern Kentucky does not have a detox, inpatient or residential program for adolescents, the closest facilities to the region are listed.

A listing does not constitute an endorsement by YSAT.

As with any medical treatment, please contact your health insurance carrier for the providers covered in your policy. Many policies have no or limited coverage for substance abuse treatment. Some treatment providers have a sliding scale fee. Others will arrange a payment policy. Some treatment providers can bill for youth substance abuse services under a program called EPSDT, which is part of Medicaid. (Except for pregnant women up to 60 days post partum, adult substance abuse services are not covered under Medicaid.) K-CHIP also may cover some youth substance abuse services.

We encourage you to call YSAT with any questions you may have regarding prevention and treatment services. Other resources to contact include: The Substance Abuse Treatment Facility Locator at <http://dasis3.samhsa.gov> or The KY Division of Mental Health and Substance Abuse at <http://mhmr.ky.gov/sa/treatment/files/DTX.asp>.

YSAT is an open collaborative. We welcome any one who is concerned and willing to work toward solutions of teen substance abuse issues.

Please help us keep this directory accurate. Provide us with new and corrected information. Contact Mary Pat Behler, YSAT Director, at 859-283-9222 or mbebler@northkey.org.

Section 1

What do you do when your child is drinking and/or using drugs?

Being proactive is the best approach to keeping your child substance free. Talk early and often with your children regarding your feelings about underage drinking and substance use. It is also important that you clearly state what the consequences will be if your child uses substances. If your child uses, enforce the consequences. If use continues, a logical consequence is enrolling your child in a prevention program **that includes a screening component**. As a parent, be prepared to participate in this program. (Prevention programs are generally low cost, but are not covered by insurance.)

DO NOT ignore underage drinking or marijuana use. From a legal perspective, your child is engaging in illegal activities, which could result in an arrest. From a health perspective, substance use at a young age affects brain development and could make the child more susceptible to addiction. From a safety perspective, many youth are hurt or killed, or make suicide attempts, while under the influence of substances.

If your child needs further assessment and/or treatment, the first call is to your insurance company to determine your coverage, as well as the treatment providers they will cover. In Kentucky, substance abuse treatment for minors is covered under a Medicaid program called Early and Periodic Screening, Diagnosis and Treatment (EPSDT), as well as some levels of KY Children's Health Insurance Program (KCHIP). If your private health insurance will not provide coverage, ask the treatment provider if they will work with you on a payment plan or assist you in finding other support.

When you begin calling treatment providers, here are some tips:

1. Keep the information you receive from your insurance company and treatment provider organized. Otherwise, you will soon be overwhelmed with information.
2. When you call the treatment provider, ask for the intake worker.
3. Be persistent. If the intake worker is not available, ask for that person's name and alternate contacts (direct line, cell phone, etc.) Also, ask if there is an alternate person to speak with.
4. Try to talk to the same person if you need to call back. This saves you from explaining your situation again. Also, it helps to build a relationship with the person, which could benefit you later.

Section 2

The following is a questionnaire that will be useful when calling treatment providers and keeping the information organized.

Substance Abuse Provider Questionnaire

This document and the attached checklist is a compilation of suggestions from local parents trying to find treatment for their children, as well as information from the Substance Abuse and Mental Health Administration and the American Academy of Child & Adolescent Psychiatry.

Provider Information
