August 17, 2017

Dear Cline Parents and Guardians,

As you know, on August 21, 2017, we will experience a near total solar eclipse in our area. We have purchased NASA approved, ISO certified viewing glasses for our students and staff. You have already received communication from Dr. Rust expressing the importance of proper eye safety.

The plan for Cline Elementary Students will be as follows:

- All students will receive classroom instruction about the eclipse.
- ONLY STUDENTS WITH SIGNED PERMISSION SLIPS will be able to go outdoors with teacher supervision for viewing the eclipse.
- Students that do not have parent/guardian permission will remain in the classroom with a teacher and work on solar eclipse activity pages.
- Forms must be returned to the teacher by Monday morning to participate.
- Additional information about the eclipse can be found at www.nasa.gov/eclipse

Sincerely,

Connie Ryle

(My child, ____________________________, has permission to view the eclipse using the approved viewing glasses with their class at school.)

I have discussed the importance of eye safety and stressed to my child that they should not look toward the sky without the approved glasses.
